# Brighten up the night, make your own lantern!

1. Cut along the outside dotted line.
2. Cut out the handle strip.
3. Cut out the windows marked with a dotted line.
4. Make sure the side with the dark lines is facing up—this will be the inside of your lantern.
5. Glue the tissue paper over the recently cut windows.
6. Once your tissue paper is dry, fold the paper to make a crease along the solid lines
7. Glue side tab to side to form lantern shape
8. Glue bottom tabs together to form the base of your lantern.
9. Glue handle strip to the top of your lantern.
10. Once your glue is dry, decorate your lantern any way you want and place your LED candle inside.
